

Introducing our SHOWIT show line, available to all of our wholesale dealers. This rebranding will help organize our feed lines, to have a true show feed line. Consolidations of the Witmer's SHOWIT feed line, along with some Hanby's Performance feeds, and a few offerings from the Heritage line, we have a freshly branded Show feed line, with new bags, product updates, and the newest nutritional technology important to show feed customers. Below are also some main points of each feed to help further help direct your customers' needs to the right feed.

SHOWIT 18% Show Pig Grower

This is an 18% protein; 4.5% fat meal show feed. Formulated with chelated minerals for best possible bioavailability of trace minerals. Highly digestible and highly available amino acids for strong growth and fill. Blended with Ambitine Technology for proper gut health and immune performance as well as sources of lactose for great feed transition for newly weaned pigs. This feed has added flavoring and calcium propionate to preserve freshness and drive intake.

SHOWIT 12% Show Calf

Coming from the Performance Feed side. This textured feed is fortified with Calf Manna and Bovamine Defend for show calves to have a successful start. Moderate fat levels and fiber coming from four sources to develop a strong rumen lining for optimal growth. With added Pre and Probiotics for enhanced immune and digestive support. This feed contains steam flaked corn, steam rolled barley, and cottonseed hulls.

SHOWIT 14% Show Calf

Also coming from the Performance Line, a higher level of protein for excelled levels of growth. Using our Cattle mixer pellets along with roasted beans and alfalfa pellets to achieve a 14% Protein 2.5% Fat levels. Pre and probiotics are added as well as Bovamine Defend. This also contains steam flaked corn, steam rolled barley, and cottonseed hulls

SHOWIT 12% RingMaster (Beef feed)

RingMaster 12% is fortified with a blend of Steam rolled Barley, cracked corn, oats, and cottonseed hulls providing maximum gut fill. Total fat is 4.5% coming from multiple sources such as Propel energy for increased daily weight gain and deposition of finish. Fortified with Availa trace minerals and Diamond V yeast for optimal nutrition. Also included is Tasco to help keep body temperature lower in high stress environments as well as Animax which is a highly palatable protein source that keeps cattle on feed during transport to shows and sales.

SHOWIT 14% Ringmaster (Beef feed)

Similar to the 12% Ringmaster but the key differences is a lower fat and higher fiber. The 14% Ringmaster is a high fiber show feed utilizing PreCon technology as well as a blend of cottonseed hulls, oats, cracked corn, and steam rolled barley. This feed is also fortified with Propel Energy for optimum daily gains and finish, uses Availa trace minerals as well as Diamond V Yeast for optimal nutrition. Also included is Tasco to help keep body temperature lower in high stress environments as well as Animax which is a highly palatable protein source that keeps cattle on feed during transport to shows and sales.

SHOWIT 16% Goat Blaster R20

Using our popular HCI 16% Goat Blaster R20 but reformulated making a show goat feed. Higher fat levels for optimal growth. This textured feed has added steam rolled barley and oats for increased fiber levels and palatability. Formulated with Availa 4 trace minerals as well as Diamond V Yeast for optimum nutrition. Added Bypass protein for accelerated muscle gain. Rumensin added for prevention of coccidiosis. Ammonium Chloride for maintaining a healthy urine PH in goats to prevent kidney stones.

SHOWIT 18% Lamb PowerPush DX

18% Protein 3% fat show lamb textured feed. Added steam rolled barley for increased intake and palatability. Deccox at 18g/ton for prevention of coccidiosis. Includes Ammonium Chloride for maintaining a healthy urinary tract. Uses Zinpro to help with hoof health. Formulated with Tasco to help lower body temperature in hot weather and stressful environments. Diamond V also added to help in nutrient absorption.
