

Beef Feed Update

Performance 12% & 14% Commercial Beef

Coming from the Witmer feed line, the 12% and 14% Commercial Beef fits a wide range of beef operations. Quality blend of corn, pellets, and oats to provide the proper nutrition for growing, finishing, and maintaining cattle.

Performance 14% Steer

A 14% steer textured feed that is over 50% pellets to promote high intake for optimal growth. Added Pre and probiotics for optimum health and nutrition.

Performance 14% Creep

This is a highly palatable textured feed. Three distinct types of pellets mixed with corn to make a balanced 14% perfect for growing and weaning calves. Vitamins and minerals are in a premixed pellet to help with intake on young calves.

Performance 14% Creep Pellet

This pellet is designed for herds who desire the consistency and intake of a complete pelleted feed. Using chelated trace minerals such as manganese, copper, and cobalt for increased bioavailability to growing beef cattle. Diamond V Natursafe is also added which helps growing cattle develop a strong rumen, boost the immune system, and optimize health and performance.

Performance 16% Beef Grower Pellet

This 16% Beef grower pellet is perfect for herds that have lower quality pastures or forages and need a little extra protein than traditional grower feeds. Pelleted for better palatability and consistency. Formulated with chelated trace minerals as well as pre and probiotics to boost the immune system and performance.
